

3-Square Product Display

This is a NEW PRODUCT OFFERING for All-States. It is an ergonomically & aesthetically appealing display package. We have packed our most popular cable ties in a variety of sizes in square, clear tamper-proof display canisters affording your customers with an immediate & clear view of the products inside.

The canisters have a foam seal inside the twist-off lids. They are ideal for retaining moisture, critical in the performance of the hygroscopic material, Nylon 66. An added foam liner is installed under the lid so that once opened, it can be closed and prevents the moisturized product from becoming dry & brittle.

In addition, if your customers want to further moisturize the product, by simply adding a few teaspoons full of water to the inside of the canisters, the products will retain their normal state of hydration substantially reducing chance of failure. Once empty, the canisters make great containers for storing other products or can be replenished from bulk stock.

Improved Product

3-SQUARE PRODUCTS

Can be ordered as individual canisters.

KEY FEATURES:

- Clear visibility to select & handle product.
- Seals in moisture.
- Can be resealed after opening preventing loss of moisture.
- Canisters can be reused for other products.
